According to (Bresser & Wilson, 2010), "at the heart of coaching lies the idea of empowering people by facilitating self-directed learning, personal growth, and improved performance.

We believe that each individual is different and has his/her own way of focusing on solutions. The journey of each client is different. We are a licensed counselling service with over 7 years of experience specializing in various life coaching areas. We value our relationship with our clients and believe that relationships signal the healing process. We believe that coaching is "a solution-focused, result-orientated systematic process in which the coach facilitates the enhancement of work performance and the self-directed learning and personal growth of the coachee" (Grant, 2001a, p.8)
